SREDAZUGOL' COMBINE MAKES MINER'S DAY REPORT

KIRGIZ COAL INDUSTRY FLOURISHES DESPITE DEFECTS -- Frunze, Sovetskaya Kirgiziya, 26 Aug 51

The entire Kirgiz coal output for 1913 was only half as great as that of one mine constructed during the five-year plans. In 1950, the coal output was 25 percent above the prewar 1940 output.

Kirgiz coal miners are meeting Miner's Day with new successes. The coal output is 6 percent above that of the first half of 1950. The Sulyuktaugol' Trust exceeded the 7-month plan 10.9 percent and Mine No 2/8 of this trust fulfilled the 7-month plan 116.2 percent.

Miners of Mine No 4-4-bis of the Kyzyl-Kiyaugol' Trust are also giving a good performance, particularly in preparing the operational area. Mine No 1-1-bis of the same trust has increased its speed of operation. For a number of years in the past the mine had failed regularly to complete the plan. Miners have now improved the condition of the main haulage passage and this has made it possible for them to exceed the 7-month plan.

Miners of Kapital'naya Mine of Tash Kumyr are meeting the holiday with the production of much above-plan coal to their credit.

In the Kok-Yangakugol' Trust, workers of the Kapital'naya Mine and Mine No 39-bis have entered into competition with each other. The Kapital'naya Mine has improved the operation of underground transport, accelerated the rate of cutting development passages, and mechanized the transport of mine timbers.

Mines of the Sulyuktaugol' Trust have taken a prominent place in mechanizing labor-consuming processes and are mining more than half their coal output with cutting machines. Here, for the first time in the Kirgiz coal industry, the miners have begun to learn how to utilize the Donbass coal-mining combine.

All the coal trusts of the Kirgiz SSR have reduced production costs of coal, and as a result have saved more than 4 million rubles above plan during a half year.

However, there are serious defects in the operations of the Tadzhikugol' Trust and in the mine of the local industry. The Tadzhikugol' Trust has been failing for a long time to complete the state plan for coal output. The first-class equipment arriving constantly at the Shurab mines is being utilized poorly. Coal industry leaders display ignorance about work organization and fail to publicize the experiences of outstanding workers. Consequently, an excessive number of idle periods occur in the mines.

TURKMEN COAL MINE EXCEEDS SECOND-QUARTER PLAN -- Ashkhabad, Turkmenskaya Iskra, 26 Aug 51

Workers of the Kugitang-Tau Mine of the Turkmen coal industry fulfilled the 1951 second-quarter plan 102 percent. During August, the miners have been fulfilling or exceeding their quotas daily. For example, they fulfilled their quota 112 percent on 19 August. Mechanization of the various phases of coal mining is still in an embryonic stage in the Turkmen coal industry, but the available means for mechanization are not always utilized.

SREDAZUGLERAZVEDKA TRUST FULFILLS PLEDGE -- Tashkent, Pravda Vostoka, 26 Aug 51

Workers of the Sredazuglerazvedka Trust are meeting Miner's Day with considerable achievements. The trust pledged to complete the month plan by 26 August and to complete the surveying of two sections. They fulfilled their pledge by 22 August. They have now pledged to fulfill the year plan by 21 December.
